

Property Asset Sales Report

Property Asset Sales Report

- Source: Government Property Register
- As at: 15 May 2017
- The Property Asset Sales Report is a list of all property assets sold by NSW State Government Cluster agencies (including State Owned Corporations and Public Trading Enterprises) as at the above date.
- The Report includes all property asset sales for each cluster which have been registered on the Land Titles System and identified in the Government Property Register. The year of recorded sales is based on the settlement date for each relevant asset sale which is updated when the titling system at NSW Land and Property Information is updated. This is through the registration of a transfer of a property dealing.
- The clusters are based on the current government cluster classifications as at the date of the Report (not historic).
- The Report may differ from any reports or information provided by Property NSW and / or individual agencies as the Report relies on registration of Transfers of Land at the Land Titles System whereas agencies often rely on internal records when reporting asset sales.
- The Report includes asset values (\$m), the number of assets sold (#) and will be updated annually.

WHOLE OF GOVERNMENT PROPERTY ASSET SALES BY CLUSTER	FY11/12		FY12/13		FY13/14		FY14/15		FY15/16		TOTAL
